

The company:

Aagon is one of the leading software manufacturer and service provider of advanced IT, in the areas of Client Management Services, Security Services and Identity Access Management.

Established in 1992, Aagon headquarter is located in Soest and has offices in Frankfurt and Berlin. Aagon Consulting has established itself as specialist in development of software to support administrative tasks in IT networks. With ACK and ACMP been the main solutions. The Services provided by Aagon, assist companies in the entire Central European region. Aagon offers professional solutions for global networks in order to improve performance, increase safety and efficiency while reducing operating costs.

Our products and solutions help companies to do more in less time with fewer resources. With that the total cost of ownership of their IT reduces. We have more than 10 years of experience in migration projects, rollouts of all sizes and development of Software packages. In the context of professional consulting services, customers also benefit from our experience.

Currently, Aagon supports more than 500 clients with an average number of 450 users.
